**Arrangements concerning the finalisation of implementation of 2011 freedom of movement**

**Brussels, 14 September 2016**

1. The parties agree to cover relevant parts of the respective licence plates with two white stickers.
2. This sticker regime will enter into force on 15 November 2016.
3. The administrative infrastructure for the issuance of all documents needed to register vehicles with licence plates issued by Kosovo authorities will be in place in November 2016.
4. The registration of all vehicles with licence plates issued by Kosovo authorities (KS/RKS) will commence on 15 January 2017 and will last for 12 months at the end of which the issue will be reviewed by the two parties with facilitation by the EU.
5. Kosovo will extend the validity of KS licence plates for 5 years at the end of which the issue will be reviewed by the two parties (with the facilitation by the EU if required).
6. Exceptions from duties and fees for the registration of vehicles will be granted by Kosovo in the same manner as in previous such occasions. Close and swift cooperation will be established between the two parties to verify legal ownership of vehicles.
7. An information campaign will be carried out by the two parties and the EU to explain to the affected residents modalities for re-registering vehicles. Further discussions on scope and modalities of such an information campaign will be discussed in the implementation group.
8. Licence plates affected by the registration process will not be affected by the sticker regime.
9. Due to the sensitivities attached to the above, parties agree to review implementation of these conclusions at regular intervals.
